

**MILL CREEK**  
COFFEE COMPANY

# ...Spills the beans

## Mill Creek hits 25 Years

Mill Creek Coffee is dedicated to the enjoyment of great coffee through various styles of brewing equipment. The goal is to enjoy a great cup of coffee with ease, at your place of employment, or for customers at those locations.. To that end we have worked hard to make this a reality in the province of BC since July of 2000. That means that in July of 2025 we will have hit 25 years in business. We never thought we would get to this point, in fact worried about how to get to the next year. But through hard work, a clear vision, great team mates and excellent partners, we are here working through our 25th year of operation.

We take this opportunity to thank so many of you who have put your trust in us to deliver what you require – great coffee and equipment so you can enjoy your day. And many of you have trusted us to do that for many years, some even decades. We are so grateful for the support.

We also want to acknowledge the team that makes this possible. Without great team members none of this would be possible. Some have come and gone, others have stayed for the ride, but all have contributed to our success and continued presence in the market. We thank you all.

As the world of Office Coffee has changed, post Co Vid, so have we. There are less and less family-owned small business, such as ours, and we are proud of our heritage. But the challenges that come with that continue to mount. But we are up for the challenge. We have great relationships with many partners and new ones all the time, that keep things vibrant and exciting. We do not take our role lightly and always accept the goal that we must prove our worth each and every visit, not thinking we are a necessity but always a luxury in the office.

What does the next chapter of our story hold? Only time can tell but it will never be dull.

Thanks for enjoying the ride with us.

## Premier provider of these fine brands:

## Coffee and the world

With news slowly coming out we want to make sure we address the issue of Coffee and the costs associated with it, long before there is a deluge of misinformation or misleading facts.

While it is true, the crop in Brazil is down this year, and has been for a few years now, the world of coffee is not ending and the supply is still available. Coffee, as the second largest traded commodity has been under extreme pressure in the past number of months and prices have doubled on the commodity trading floor. However, this does not mean that prices from us have had the same impact.

What is at play is the cost of green coffee, where speculators have driven up the price, simply to gain profits before exiting the market to move onto other things, and the cost of the US dollar. Both have ratcheted up in recent months putting a double whammy at play.

So how does this affect everyone? For our customers, we have had some minor adjustments, and continue to monitor the situation. Because of our long term relationship with key coffee roasters, we are in a good position to weather the storm. We have various ways to do that and we have been encouraging each of our team members to discuss those options with you.

Feel free to reach out to learn more. But for the long term we feel things will settle down, perhaps not to pre Co Vid numbers where green coffee sat below \$1 US, but more realistically to the low \$2/lb or high \$1.90lb. range. Time will tell if we are right but experience is on our side.

Nevertheless, we have lots of choice and options to help you manage budgets. I guess that is what 25 years of experience has taught us. We welcome the conversations.

# New featured brewers

C300 + Chill Unit

C600 + Chill Unit

Our newest offering, Flavia brewing, allows each consumer to select and brew their own taste. Designed for a sleek look suitable to any office environment, these machines produce excellent drinks in a variety of tastes, such as Peet's, Starbucks, Lavazza, Alterra or teas and hot beverages. With the chiller unit included you can now add cold brew coffee, iced tea or infused waters. All at the touch of a button. Easy, compact, and environmental as the packets can be recycled. Try the newest in coffee innovation at your office, call us to try it out.

Available brands:

## NESPRESSO Momento 100

For the true coffee aficionados we offer the Nespresso Momento, the latest from Nespresso. Nespresso is known for its true espresso taste in a simple format. Producing coffees in a variety of roast profiles, this machine makes an excellent espresso, long shot, or americano. And with the ability to recycle the capsules, it is a win for everyone. With its clean, silver look it accents any office or break area. For those that want the best, give us a call to try it out.
